NORTH ISLAND SHIPPING: \$185 + GST

SOUTH ISLAND SHIPPING: \$285 + GST

Cleans the air through a Chemical and HEPA filter before exhausting clean air back into the laboratory without the need for external ducting.

To qualify as HEPA (High Efficiency Particular Air) filter by industry standards, an air filter must remove (from the air that passes through) 99.97% of particles that have a size greater-than-or-equal-to 0.3 μm .

Extra HEPA filters available at \$585 + gst

JAGBE NG-DUCTLESS FUME HOOD \$14,980.0

PRICE EXCLUSIVE OF GST

DIMENSIONS: 2070H x 1600W x 790D

NORTH ISLAND SHIPPING: \$185 + GST

SOUTH ISLAND SHIPPING: \$285 + GST

This New Generation Jagbe NG-Non Ducted Fume Hood range has been designed to remove the problematic requirement for Ducted fume hoods which can require an expensive installation. Our New Generation Jagbe NG-Non Ducted Fume Hood range supersedes the old Ducted style and is completely mobile. It does not require any building consents to be installed and becomes part of your assets not your building. Through advanced smart technology we have developed our fume hood which simply recirculates the air through a series of smart filters it cleans the chemical laden air and reintroduces clean breathable air back into the laboratory. Not only does it clean the air from the Fume Hood chamber, but also the stale air in the clean room will be filtered while the fume hood is in operation.

PRICE EXCLUSIVE OF GST

DIMENSIONS: 2590H x 2400W x 1100D

SHIPPING: \$285 + GST

PRICE: \$7375 + GST

2.4 wide x 1.1 Deep Std height (8ft 6") with end opening, galv granting, 400L Bund capacity, gives Max 800 Litres of storage

HOTWALL™ EXTREME TEMPERATURE INSULATION (HETI) \$169.75

\$169.75 + GST per Roll

SHIPPING: \$25 + GST per Roll

Manufacture Technology

- Has low shrinkage and high tearing strength. Smooth texture and integrity surface.
- We use high purity raw materials without any binding agent, ensure the product own good reliability and stability in any environment. the function of the HETI isn't affected by water and oil, it will recover its thermal performance and physical properties after drying.
- We have a wide range of material selection to gain the best heat insulation structure and energy-saving effect. Including "Aluminium Foil" coated.

Features

- Low heat strong capacity, Low thermal conductivity
- Excellent thermal stability and shock resistance, resist devitrification at high temperature
- Excellent tearing resistant
- Excellent insulating performance, fire prevention and sound absorption
- Easy cutting and installation

Typical Application

- All kinds of industrial kiln linings (hot surface and back lining)
- The insulation used in HotWall™ Flammable Goods Cabinets
- Furnace body expansion joints, furnace doors.
- High building fireproof and heat insulation
- Thermal resistance component in Auto and Marine industries
- High-temperature filter media
- Insulation for field stress relieving of welds.

HOTWALL™ FLAMMABLE GOODS CABINETS WITH 1200 DEGREE C FIRE RATED INSULATION **\$3,285.00**

Manufactured far beyond AS1940 standards

75mm thick 1200 Degree C Rated HotWall™

Extreme Temperature Insulation, Sandwiched between Double skinned Heavy 1.2mm Steel Walls, Doors, Roof and bund.

Flush mounted, Key Lock, Door handle with 3 position catches, Robust internal door closers, Fully seam welded.

Under bench model: 80 Litre. \$ 3285 + GST

Measurements:

Outside: 965mm wide x 770mm High x 620mm Deep

Inside : 805mm Wide x 460mm High (above shelf over the bund) x 460mm Deep.

Doors and all walls 80mm thick.

Weighs: 135 Kg

Free Standing model 240 Litre. \$ 4299 + GST

Measurements;

Outside: 860mm wide x 1825mm High x 860mm Deep

Inside: 700mm wide x 1435mm High (Above shelf over the bund)x 700mm Deep.

Doors and all Walls 80mm thick

Weighs 385 Kg

Facts:

Volcanic rock melts and runs between 800-1200 Degrees C

Paper ignites at 174 Degrees C

Petrol Ignites at 230 Degrees C

A house is generally destroyed in a fire at 600-1000 Degrees C
